

# BLUESTONE PAVERS STONE MATERIAL

Is very durable and versatile due to its hard and dense composition

Can be used for veneers, as building stones, or flagstone for paving

Is unique because every stone varies in shade, texture and quality from one to another

Can be purchased in varying thicknesses and dimensions; suitable for all types of applications

# BLUESTONE AND CLAY BRICK PAVER APPLICATIONS

Bluestone Pavers Offers Two Finishes.

- Thermal Bluestone (pictured left) is flame treated to create a pebbled uniform surface. Thermal treated bluestone pavers are ideal for walkways and patios as the surface becomes non-slip and therefore safe in high traffic areas.
- Natural Cleft (pictured below) Bluestone create a non-uniform surface. This offers a more natural look, in regards to the color and texture of the bluestone. Natural cleft is a hard wearing stone and can stand up against the harshest of weather.

# BLUESTONE PAVER COLORS

What is unique about Bluestone Pavers is that each pavers differ from the next; no two are the same.

The color of the pavers will never fade or be affected by the weather because of its natural beauty.

Bluestone Tumbled Cobble pavers are particularly popular for garden areas.

Bluestone, although mostly consisting of blues and grays, can vary in color to include brown, green yellow, rust and, at times, purple.

# CLEANING CLAY BRICK PAVERS AND BLUESTONE

- ☞ Clay Brick and Bluestone sidewalks may need to be cleaned.
- ☞ Try to keep the walkway and patio areas swept clean to avoid stains.
- ☞ To remove stains, simply use a garden hose and a hard bristle broom.
- ☞ For stubborn areas, you can use a mild household detergent. Let it stand for a few minutes, then, with warm water, brush with a broom.

# SEALING BLUESTONE AND CLAY BRICK

A porous sealer will also protect bluestone from:

- Damaging heavy foot traffic.
- Chlorine and salt water around pool areas
- Dirt and grime from surrounding gardens.
- Scratches, marks, and stains.

## Safety Benefits

Bluestone has a rough natural texture which makes it safe for any flooring application, even in pool areas. Once it is sealed it continues to have a high safety factor.

# WHY CHOOSE CLAY BRICK PAVERS?

You can apply brick pavers to all areas around your outdoors.

Whether it's your patio, walkway, driveway, retaining wall or pool area, you can be sure that they will make a statement of beauty and integrity.

You'll have your neighbors wanting to do their place the same...
